DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 21 is rejected under 35 U.S.C. 102(b) as being anticipated by Barge (4,459,521).

Barge teaches a motor condition detection method for detecting a locking condition of the motor 9 comprising steps of: detecting motor driving voltage of driving electric source supplied to the motor; detecting ripple intensity of the motor driving voltage; and first determining the locking condition of the motor based on the ripple intensity of the motor driving voltage during driving of the motor (see col. 11, line 52- col. 12, line 5).

Allowable Subject Matter

3. Claims 1-20 are allowed.
4. Claim 22 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
